Characteristics

Casting made from special aluminium alloy.

Pneumatic tool for a fast and precise firing of upholstery studs, easy to load and handy to use. This stud nailer is equipped with a **new pneumatic feeding system** which allows: better feeding flow compared with the previous mechanic model; higher firing speed (at least 25% more); easy access to the front piece in case of jamming.

Applications

Pneumatic tool for a fast and precise driving of decorative nails.

Easy to load and operate.

BORCHIE

GL=

plain shank

Plain shank nails to be driven into wood, mainly used in furniture factories and upholstery work-shops.

GA=

ring shank

Ring shank nails to be driven into materials like polyurethane, plastic and soft wood. Mainly used in dog/footwear factories.

SCREW HEAD

Ring shank,

Meant for dogs and footwear factories:
